Where is the "I" in Team? It is in Client...right there at the center of the team.	Dr Katy Theodore	An outline of how we may work together to treat the person as a whole
Silver Diamine Fluoride	Maria Luisa Mamerto & Ana Ivanovic	Silver Diamine Fluoride has broad application in Dentistry. It is found to be effective in preventing dental caries and arresting existing lesions in a simple, quick, and non-invasive way. Evidenced-based technology shows Silver Diamine Fluoride offers an effective approach in older adults, injecting drug users and children, providing an alternative treatment modality. It has been found to reduce anxiety in children and older adults, reduce use of local anaesthetics, reduce cervical root hypersensitivity in older adults, improved oral health care particularly in outreach programs and have demonstrated a 'shift 'from surgical to non-surgical management of dental caries in children, injecting drug users and older adults in the community.
